

## Intellectual Property

Trademarks, copyrights, patents and trade secrets are valuable assets. Not only do we assist our clients in protecting them, we are able to strategically create, manage, develop and strengthen them in the marketplace. In addition, we assist clients with federal and state registration and administrative requirements along the way. We also provide trademark searches and advice for businesses, to avoid infringing on others' rights and lawsuits by the rights holder. Further, we are also well versed in domain name disputes, metatag infringement and arbitration through ICANN.

Your trademark identifies your goods and service. It is a symbol of your hard work, quality and skill. It enhances the value of your products and services and while your trademark may not yet be as recognizable as the Golden Arches of McDonald's, it may have more value than you realize. As a vital and integral element of your identity and business, your trademark must be vigorously protected.

A trademark can take many forms. The name of something you invented, the name of your business, the interior layout and design style of your restaurant, the appearance of your package, the symbol worn on your deliveryman's hat, or any combination that may indicate the origin of your product or service. Mohajerian Inc. can help you register marks for words, symbols, designs, or combinations of these. Depending on the form of your 'property', you may register either a trademark or a service mark and Mohajerian Inc. can help you determine which one is right for you.

If you don't register your copyright and someone else passes the work off as their own, the burden will fall on you to prove otherwise. The simplest way to avoid this burden and expense is to let us help you properly register your work with the Copyright Office of the Library of Congress. Once registered, you and you alone may decide how your work may be used, published, and distributed.
