

Our Firm

We believe that the problems facing many individuals and businesses today can be addressed by taking a proactive, preventative approach. Thus, we assist clients in identifying issues before they develop into problems or lawsuits. Our risk avoidance services include detailed examinations and evaluations of clients' business practices, policies and procedures. We are fully prepared to tackle clients' problems thru negotiation, mediation, arbitration and litigation through trial. We combine strategy with skill to maximize each client's success in and outside of the courtroom.

Our emphasis is on personalized relationships, to determine each client's unique goals and establish a foundation for their success. We are an aggressive legal services provider with total commitment to excellence and results. We deliver extraordinary responsive, creative, practical and high-quality solutions to your problems. We provide personal attention to your ever-changing needs at a competitive cost that the big firms simply can't afford.

We are an aggressive and responsive provider of legal services with a total commitment to excellence. We are dedicated to the interests of our clients and deliver extraordinary responses, creative, practical and high quality solutions to their problems, developed from their point of view. We are also dedicated to providing our clients with quality service at a competitive cost.

Mohajerian Inc., is a full-service firm with a national practice dedicated to franchise and licensing matters. Our franchise team is an alternative to the large, expensive law firms that cannot give their clients the individual attention they deserve. Our clients include both franchisors and franchisees nationwide. They include single and multi-unit owners and operators, franchise industry suppliers, potential franchisees and first-time franchisors. Our extensive experience in this industry has given us extraordinary insight into the myriad issues that may be encountered. In addition, it allows us to offer effective services and solutions efficiently and economically.

We have experience counseling both franchisors and franchisees in all phases of the franchise operation and business relationship. We handle cases from negotiating and resolve simple disputes between franchisors and franchisees all the way through high-stakes complex litigation. Whatever the case though, we provide practical, solution-oriented advice and business counsel to bear on each client's distinct situation.

Business Law

Mohajerian Inc. provides practical business and legal solutions for our clients. We strive to understand the unique aspects of each client's business and then work to implement a customized, proactive approach to meet the client's goals. Our practical approach helps our clients prevent disputes among principals, between principals and employees, and with competitors and customers.

The laws that govern and regulate businesses and entrepreneurs are vast and numerous. Mohajerian Inc. can help you get on the right track with your business by interpreting the law and counseling you on the proceedings of your business.

It is virtually impossible to give a complete account of all the laws and loopholes that could affect the formation and operation of an emerging company. There are a number of legal issues, though, of which you should be aware and that Mohajerian Inc. will assist you with. The most common types of laws that may apply to your business fall into several categories:

Business Formation Laws: A variety of state laws govern what steps you need to take to properly form and operate the business entity (partnership, corporation or limited liability company, etc.) you choose to form.

Consumer Protection Laws: Many federal and state laws protect consumers from fraudulent business acts, misleading advertisements and defective products. These laws also mandate various credit rules and disclosures.

Contract Laws: A number of laws may affect the contents of your contracts. But many will purely be the subject of negotiations, so make sure you know the key issues when negotiating and preparing contracts.

Hiring Laws: A fair number of laws regulate hiring. Pay particular attention to laws forbidding discrimination based on sex, race, religion, age, etc.
